EUROVENT CERTIFIED PERFORMANCE www.eurovent-certification.com

A CLASS · R410A · PLATE · SHELL · A C · MICRO CHANNEL

MAIN FEATURES
- Air cooled liquid chiller in A class energy efficiency.
- 31 models available, for a wide selection opportunity.
- Average step of 25kW.
- EER up to 3,21.
- ESEER up to 4,69.
- Latest generation scroll compressors.
- R410A Refrigerant charge.
- Units with one, two, three or four refrigerant circuits.
- Plate type or shell and tube heat exchangers.
- AC Axial fans.
- Electronic expansion valve.
- Units with one, two, three or four air circuits.
- Modular construction
- Suitable for outdoor installation.

MAIN BENEFITS
- Two compressors for each refrigerant circuit to reach high efficiency.
- Units with one, two, three or four refrigerant circuits.
- Microchannel condensing coils in aluminium.
- Low refrigerant charge.
- High EER and ESEER. A Class energy efficiency.
- Availability of kit for the reduction and the extreme reduction of the noise.
- Availability of pumping groups with low, medium, high discharge head.
- Availability of total or partial heat recovery system.
- Availability of EC fans with available external static pressure.
- Extremely easily of maintenance.
- Complete set of components dedicated to the safety of the unity.
- Eurovent Certification.

MICROCHANNEL CONDENSING COILS
The coil weight is only 50% compared to traditional copper pipes and aluminium fins of the same capacity. The reduced air resistance of the micro-channel coils allows to drastically reduce the fans motors electric energy consumption. At the same performances conditions, the micro-channels condensers require up-to less than 75% refrigerant when compared to the traditional heat exchangers.

ELECTRONIC EXPANSION VALVE
The electronic expansion valves are synonymous of an higher energy efficiency and stability of the system.

A CLASS ENERGY EFFICIENCY
The best and most accurate components applied to the chillers.

WORKING LIMITS IN COOLING MODE
Chilled water outlet temperature: -12÷20°C
Ambient temperature: -10÷45°C

rcgroup.it
1 9 6 3 2 0 1 3
fifty**cool**years

MAIN COMPONENTS

FRAMEWORK

- Base, self supporting frame and panelling in steel plate with protective surfaces treatment in compliance with UNI ISO 9227/ASTMB117 and ISO 7253, and painted with epoxy powders.
- Containing box for compressors, evaporator and electrical panel (for W cabinet only);
- Compartment for electrical panel on unit front for direct access to control and regulation devices.
- Colour: RAL 9002;

COMPRESSORS

- Orbiting spiral (SCROLL) hermetic compressors with spiral profile optimized for R410A refrigerant;
- ON / OFF capacity control (0 / 100% each compressor);
- 2-pole 3-phase electric motor with direct on line starting;
- Crankcase heater;
- Electric motor thermal protection via internal winding temperature sensors;
- Equalization system of the lubricant oil for units equipped with 2 compressors operating on the same refrigerating circuit;
- Rubber supports.

EVAPORATOR

Up to model 430 P4 D VT4 included:

- AISI 316 stainless steel plates type, vacuum brazed using copper as brazing material:
  - With single hydraulic circuit for all machines;
  - With single refrigerant circuit for S version machines;
  - With double refrigerant circuit for D version machines.
- Polyurethane insulation foam with closed cell;
- Temperature sensors on water inlet and outlet;
- Factory assembled differential water pressure switch for water flow control (size W);
- Paddle flow switch for water flow control, supplied in mounting kit (size VT)
- Antifreeze heater;
- Hydraulic piping insulated with closed cell elastomeric foam;
- Hydraulic connections with grooved end complete with flexible joint and adapter pipe for solder connection.
- The hydraulic connections are carried outside the unit (size W only).

From model 455 P6 T VT5 included:

- Shell and tube evaporator optimized for R410A refrigerant.
- Tubes with a helical rifled internal surface.
- Intermediate baffles positioned to ensure optimum speed of the fluid and low pressure drops.
- Refrigerant/Hydraulic circuit:
  - o Water side:
    - Single circuit
  - o Refrigerant side
    - Three circuits from 455 P6 T VT5 model to 646 P6 T VT6 model, both included
    - Four circuits for the remaining models
- Shell, header, tube sheets, made of carbon steel, tubes in Cu.
- Polyurethane insulation foam with closed cell;
- Hydraulic piping insulated with closed cell elastomeric foam;
- Temperature sensors on water inlet and outlet.
- Water flow switch for water flow control on water outlet towards the plant, not installed but supplied in kit.
- Hydraulic connections with grooved end complete with flexible joint and adapter pipe for solder connection.
- Antifreeze heater.

CONDENSING COIL

- Microchannel condensing coil in aluminium and they are perfectly suitable for the civil and industrial applications cooling, while the protection function of the oxide layer allows an optimum resistance to corrosion also in case of aggressive ambient conditions;
- Extremely light construction. The coil weight is only 50% compared to traditional copper pipes and aluminum fins of the same capacity;
- Low air side pressure drop and consequentially drastic reduction of the fans motors electric energy consumption;
- High heat exchange efficiency;
- Reduced internal volume capable of reducing the total refrigerant charge. At the same performances conditions, the micro-channels condensers require up-to less than 75% refrigerant when compared to the traditional heat exchangers;
- Single air circuit for machine version S;
- Double air circuit for machine version D;
- Triple air circuit for machine version T;
- Quadruple air circuit for machine version Q;
- Frame in painted galvanized steel.

FANS SECTION

- Axial fans with sickle-shaped blades, fan guard and optimized for low noise levels;
- External rotor AC type electric motor with stepless variable speed for condensing pressure control;
- IP54 enclosure class.

REFRIGERANT CIRCUIT

Components for each refrigerant circuit:

- Electronic expansion valve. The valve allows high performance and system efficiency thanks to a timely and accurate response to changes in temperature and pressure;
- Electronic expansion valve energy reserve module to allow the closure of the valve in the event of lack of power supply.
- Sight glass;
- Filter dryer on liquid line;
- Service valves on liquid line and gas discharge;
- Safety valves on high and low pressure side;
- Pressure transducers with indication, control and protection functions, on low and high refrigerant pressure;
- High pressure safety switch with manual reset;
- Refrigerant circuit with copper tubing with insulation of the suction line;
- Plastic capillary hoses for pressure sensors connection;
- R410A refrigerant charge.

ELECTRICAL PANEL

In accordance with EN60204-1 norms, suitable for outdoor installation, complete with:

- Main switch with door lock safety on frontal panel;
- Magnetothermic switches or fuses for each compressor;
- Magnetothermic switches for each fan motor and water pump (if scheduled).
- Contactors for each compressor motor;
- Transformer for auxiliary circuit and microprocessor supply;
- Machine operating mode selector “Loc – Off - Remote”:
  - Loc position: Machine is active;
  - Off position: Machine is deactivated;
  - Remote position: The machine is remotely controlled with a command by the Customer. Electric connections in the terminal.
- Terminals:
  OUTLETS
  - Voltage free deviating contact for General Alarm 1.

  INLETS
  - External enabling (from timer, etc. At Customer care);
  - Remote control (from operating mode selector. At Customer care);
  - Emergency unit stop with signalling on display (external alarm. At Customer care).;
- Panel with machine controls;
- Power supply:
  400V / 3Ph / 50Hz + N for machine size W
  400V / 3Ph / 50Hz for machine size VT

CONTROL SYSTEM

- Microprocessor control system with graphic display for control and monitor of operating and alarms status. 6 keys terminal. The system includes:
  - Clock card for alarms date and time displaying and storing;
  - Predisposition for the memorization of the intervened alarms;
  - Predisposition for connectivity board housing (RCcom MBUS/JBUS, LON, BACnet for Ethernet (SNMP- TCP/IP), BACnet for MS/TP). The electronic cards are optional accessories;
  - Main components hour-meter;
  - Non-volatile “Flash” memory for data storage in case of power supply faulty;
  - Analogue set point compensation (0÷1 Vdc) according to an external analogue signal at Customer care;
  - Menu with protection password;
  - LAN connection.

1. Referred to chilled water temperature 12/7°C – 0% glycol solution; air temperature to the condenser 35°C. Fouling factor of the exchangers 0,043 m²°K/kW.
2. Sound power level [Lw] according to ISO EN 9614 – 2.
3. Average sound pressure level [LPm] 1m far according to ISO EN 3744.
4. Hydraulic connection with grooved end complete with flexible joint and adapter pipe for solder connection.
5. Referred to chilled water temperature 12/7°C – 0% glycol solution; air temperature to the condenser 35°C; water temperature heat recovery 40/45°C – 0% glycol solution. Fouling factor of the exchangers 0,043 m²°K/kW.
6. Referred to chilled water temperature 12/7°C – 0% glycol solution; water temperature heat recovery 40/45°C – 0% glycol solution; Fouling factor of the exchangers 0,043 m²°K/kW.
